

Finding the right journal in which to publish your article can be a difficult process.

What type of manuscript?

- **Full articles / Original articles:** the most important papers. Often substantial and significant **completed pieces of research.**
- **Letters / Rapid Communications/ Short communications:** **quick and early communication of significant and original advances.** Much shorter than full articles (check limitations).
- **Review papers / perspectives:** summarize recent developments on a specific topic. Highlight important previously reported points. Not the place to introduce new information. **Often invited.**

Self-evaluate your work. Is it sufficient for a full article? Or are your results so thrilling that they should be shown as soon as possible?

Ask your supervisor and your colleagues for advice on manuscript type. Sometimes outsiders can see things more clearly than you.

Selecting the right journal for your scientific manuscript

■ Outline:

- **Criteria** to consider
- Impact factor & other **metrics**
- **Open access** journals
- **Tools:** help identify journals to publish in

Criteria to consider: journal information/content

- Journals used by yourself/ mentors/advisor/ colleagues
- Types of articles published (original research, review, case study)
- Length of manuscript accepted
- Supplemental data

Criteria to consider: Reputation of the journal

- # years in publication
- Cost and availability (journal cost effectiveness)
- Open access
- Peer review status
- **Impact factor**

Criteria to consider: Reputation of the journal

- Reputation of the journal (publisher, editor)
- Acceptance/rejection rates (journals with lower acceptance rates are generally more prestigious)
- Quality of accepted articles and authors
- Audience of journal (readership)
- Audience Size (indexing & circulation)

Criteria to consider: Review Process

- Time to publication (speed of peer review, pre-pub online)
- Publication Costs & Author Fees: (should fall in the industry standard \$1500 - \$5000 range)

Select the best journal for submission

- Look at **your references** – these will help you narrow your choices.
- **Review** recent publications in **each candidate journal**. Find out the hot topics, the accepted types of articles, etc.
- Ask yourself the following questions:
 - Is the journal **peer-reviewed**?
 - Who is this journal's **audience**?
 - What is the **average time to print**?
 - What is the journal's **Impact Factor**?
- Decide on **one** journal. **DO NOT** submit to multiple journals.

An international editor says...

*“The following problems appear **much too frequently**”*

- Submission of papers which are clearly out of scope*
- Failure to format the paper according to the Guide for Authors*
- Inappropriate (or no) suggested reviewers*
- Inadequate response to reviewers*
- Inadequate standard of English*
- Resubmission of rejected manuscripts without revision*

Choosing the best journal for your work

- Publishing your research in the right journal can help you reach a global audience, make an impact and move forward in your career.
- How can you make sure your publication is the best it can be?
- JournalFinder
- Journal metrics
- Speed
- Reach

Journal scope

Trends in Endocrinology and Metabolism is a leading Reviews journal in the fields of metabolism and endocrinology. We publish polished, concise, highly read and cited articles of topics at the cutting edge covering basic, translational, and clinical aspects; from state-of-the-art treatments of endocrine diseases to new developments in molecular biology. Read about recent advancements in diabetes, endocrine diseases, obesity, neuroendocrinology, immunometabolism, molecular and cellular biology, and a host of other areas.

TEM serves as an invaluable source of information for researchers, clinicians, lecturers, teachers and students. Reviews and Opinion articles form the foundation of each monthly issue. Reviews are invited from leading researchers in a specific field and objectively chronicle recent and important developments. Opinion articles provide a forum for debate and hypotheses. Our shorter pieces include Science & Society that highlight topical issues at the intersection of science, society and policy, Spotlights; that focus on exciting recent developments

Journal metrics

- Impact Factor – Clarivate metric – number of times an average paper in the journal is published
- CiteScore – average citations received per document published in the journal.
- 5-year Impact Factor – Clarivate metric – Impact Factor based on five years of history.

Journal metrics

- Article Influence & Eigenfactor – citations from highly ranked journals are more important and influential than those from lower ranked journals
- Source-Normalized Impact per Paper (SNIP) – the impact of a paper within a subject field.
- SCImago Journal Rank (SJR) – a prestige metric based on the idea that “not all citations are created equal.”

Speed

- The average number of weeks it takes for an article to be reviewed. ● The average number of weeks it takes for an article to reach key publication points in the production process.
- **Reach:** The number of primary corresponding authors at the country/regional level over the last five full years available.
